ELSA Solutions SpA confirms its participation as exhibitor at GreenPlast 2025

Imola, april 24th 2025 | ELSA Solutions SpA is pleased to announce its participation in the second edition of GreenPlast, one of the most important events dedicated to environmental sustainability, energy efficiency, recycling and circular economy in the plastics and rubber industry. The event will take place in Milan, at Fiera Milano Rho, from 27 to 30 May 2025.

The company will be present with its E-Motion division, dedicated to the supply and support of medium and high power low voltage motors and drives. Visitors will be able to discover the solutions promoted by ELSA Solutions at stand D53 - Hall 14, where some of the most relevant in the industry will be on display.

During the event, the ELSA sales team will be present to provide advice and illustrate all the solutions proposed by the company.

"Our participation in GreenPlast 2025 is an opportunity to face the realities at the forefront of the reference sector, aimed at optimizing production processes through the choice of highly efficient electric drives," said Davide dal Pozzo, CEO of ELSA Solutions SpA. "Our logistic capacity and the know-how acquired in more than 40 years of activity position us as a strategic partner for equipment manufacturers who need integrated services and solutions in the field of motion control."

ELSA Solutions invites professionals, companies and industry stakeholders to visit its booth D53 - Hall. 14 to discover its solutions.
