ELSA Solutions SpA confirms its participation in MECSPE Bari 2025 as an exhibitor

Imola, Thursday, October 30, 2025 | ELSA Solutions SpA is pleased to announce its participation in the 2025 edition of MECSPE Bari, one of the leading events for innovation and technology in the manufacturing industry. The event will be held in Bari, at the Fiera del Levante exhibition center, from November 27 to 29, 2025.

The company will be presenting its E-Motion product line, dedicated to the supply and system integration of complete high-power low-voltage drives. Visitors will be able to discover the technological solutions offered by ELSA Solutions at stand 004 in hall 30, where some of the most innovative and relevant solutions for the industrial production sector will be on display.

During the event, ELSA's sales team will be on hand to offer advice and provide detailed explanations of all the integrated solutions offered by the company, aimed at optimizing production processes through the adoption of high-efficiency motion control systems.

'Taking part in MECSPE Bari 2025 is a valuable chance for us to connect with leading figures in the manufacturing and industrial automation industries,' said Davide Dal Pozzo, CEO of ELSA Solutions SpA. 'Our forty years of experience, coupled with our ability to offer customized services and solutions, make us the ideal partner for plant manufacturers and all companies focused on technological innovation.'

ELSA Solutions invites professionals and companies in the sector to visit stand 004 – hall 30 to discover all the latest news and cutting-edge solutions developed by the company. For more information, visit the official website <https://elsaweb.it>.
